

SMC Management Enterprise

Official System Credentials & Production Configuration Vault

CONFIDENTIALITY & SECURITY NOTICE

This document contains high-security credentials, database passwords, encryption secrets, and production server configurations for BusinessManager Enterprise. Keep this file stored in a secure, encrypted location.

1. Super Administrator Account

Initial Admin Username	sethu	Primary System Administrator account
Default Admin Password	Sethupathi#*\$1	Default master password
Granted Role	ROLE_ADMINISTRATOR	Full system access & administration

2. MySQL Production Database Credentials

Database Host / Service	mysql (port 3306)	Docker internal MySQL network host
Database Name	businessmanager_prod	Production schema name
Database Username	businessmanager	Application DB user account
Database Password	StrongDBPassword123!	Application DB password
MySQL Root Password	StrongRootPassword123!	MySQL root administrative password

3. Authentication, Cryptography & Token Keys

JWT Secret Key	BusinessManager_JWT_2026_StrongSecret_9xK7mP2q	HMAC-SHA token signing key
JWT Access Expiration	3600000 ms (1 Hour)	Duration of access token valid period
JWT Refresh Expiration	604800000 ms (7 Days)	Duration of refresh token valid period
Crypto Field Secret	BusinessManagerCrypto_2026_X7k9P2m4	AES encryption key for sensitive DB data

4. Automated Backup & Recovery System

Backup Engine Enabled	true	Automated cron scheduled backups active
Storage Directory	/opt/businessmanager/backups	Mounted host volume directory
Backup Cron Schedule	0 0 2 * * ?	Triggers daily at 02:00 AM
Retention Enabled	true	Automatic purge of legacy backup files
Retention Period	30 Days	Keeps backups for 30 calendar days

Retention Cron Schedule	0 0 3 * * ?	Purge cleanup runs daily at 03:00 AM
Backup Encryption Key	BusinessManagerBackup_2026_X7k9P2m4	Key used to encrypt dump archives
Database CLI Tools	mysqldump / mysql	Internal utilities for dump/restore

5. Server Network & Docker Deployment

Spring Profile Active	prod	Production runtime profile
Container Server Port	8080	Backend HTTP server listener port
CORS Allowed Origins	http://192.168.1.8:8080	Authorized cross-origin web client IP
Docker Compose Specification	docker-compose.prod.yml	Production containers definition file
Environment Vault File	.env	Server-level environment variables file
